

## Environmental Policy

### Our Commitment

CLL Corp. Services Limited (CLL) have established this policy to be consistent with international standards, industry practices and regulatory requirements as well as providing a framework for the setting and regular review of our environmental objectives (i.e. reduce environmental incidents, reduce fleet emissions, reduce paper printing etc.)

### How we will achieve it:

#### Protect the environment:

CLL will ensure to protecting the environment, biodiversity and ecosystems including the prevention of pollution and reducing waste overall.

#### Reduce consumption:

CLL will endeavour to reduce consumption of natural resources by efficient use of water and energy etc.

#### Conform:

CLL will ensure conformance with applicable legislative, regulatory and general compliance obligations.

#### Procurement:

Purchasing decisions will be in line with our commitment to reduce our environmental impact and to ensure continual improvement.

#### Participation:

CLL will encourage participation from our workers and identify and reward their performance.

#### Continual improvement:

CLL is committed to continually improving our environmental management system and to enhance environmental performance via environmental gap style analysis (i.e. identifying key environmental issues, regular audits of our sites and systems).

#### Communication:

This policy is communicated to all workers, interested parties as well as being made available to the wider community via our site-specific documentation.
